

Calculus Class Guidelines and Policies
Mr. David Bergt, Instructor

- Love the Lord your God with all your heart, soul, and mind. Love your neighbor as yourself.
- All assignments must be completed with a pencil. I will not accept problems done in pen. You also need to bring paper, graph paper, calculator, a pen, and your textbook.
- This is a college level class and will be taught as one. You will be expected to learn every topic in a timely manner. You will be expected to take an active role in learning—questions, comments, and notes. I will spend my time and effort with the students who put in time and effort.
- Tests are 70% of your grade. Test corrections are 15%. Participation is 15%. Participation is based on your homework, class behavior and effort and can be above 100% or below 0%.
- All work must be shown on the homework and tests. A lower grade may be assigned for problems not worked on the paper **even if they are correct**.
- All incorrect problems on a test must be reworked as a separate assignment. This is to be done immediately after the test is returned. You will be able to continue reworking problems until the next test. Completed test corrections count 100% and uncompleted count 0%. If you are having difficulty see me **immediately**.
- If you are absent from class, you will be given **one** extra day to do the assignment for every day you were absent. Write “absent” on the top of the assignment before handing it in. Special arrangements for more time may be made with me.
- Assignments without names or lesson numbers will receive a lower grade. Tests without names can lose 10%.
- Keep your math papers to yourself. If your paper is found in the possession of someone else your homework **and** participation portions of your grade may become 0%.
